PRODUCT OVERVIEW

The LMP USB-C Video Hub combines video output (HDMI up to 4K@30 Hz) with fast data transfer (3x USB 3.0) as well as pass-through power (Power Delivery over USB-C port) to the 12" MacBook and 13" and 15" MacBook Pro. Its USB-C port is capable of transferring data from and to your Mac laptop as well. Last but not least there is a designated USB 3.0 port which charges a smartphone or tablet with up to 7.5 Watt (5V/1.5A).

The aluminum housing is sturdy and stylish alike and it takes care of the evolving heat. With its 15 cm connecting USB-C cable, the Network Hub keeps the cable clutter away from your laptop. Connect your Mac laptop or iMac to the any display or TV with a most widespread HDMI port and exchange data to your proximity.

Note: Not compatible with Apple USB SuperDrive. May evolve heat when in use. For highest possible resolution of 4K@30 Hz over HDMI, attached display or TV must support the resolution and refresh rate.
